

Wholesale Distributor Modernizes IBM i Documents and Makes them Web-Accessible

Document web access gives employees, partners and customers secure access to invoices, orders and other documents.

BCD and Quadrant Professional Services developed a document web access solution for a wholesale distributor* to make it easier for employees and partners to access invoices, orders and other documents. The solution uses [Formtastic](#) to transform the organization's pool files into modern looking PDFs. Users get self-serve, menu-based access from browsers on any PC at any time via a customized [Nexus](#) portal.
